## PROJECT WORKS

### WIRELESS ELECTRONIC NOTICE BOARD USING ARDUINO AND HC-05 BLUETOOTH MODULE

- Developed a wireless electronic noticeboard using Arduino, HC-05 Bluetooth module for seamless communication.
- Enabled real-time message display on an LCD screen by transmitting text via a mobile app over Bluetooth.
- Designed a simple and user-friendly interface to allow quick updates without physical access to the board.

### VOICE-CONTROLLED AUTOMATED WHEELCHAIR WITH INTEGRATED HEALTH MONITORING

- Designed a smart wheelchair system to enable hands-free navigation for individuals with physical disabilities.
- Integrated health monitoring sensors to track vital signs such as heart rate, temperature, and oxygen levels.
- Implemented Bluetooth-based mobility control and GSM alerts to ensure user safety and timely caregiver support.
